

# Digitizing the Retail & Grocery Supply Chain

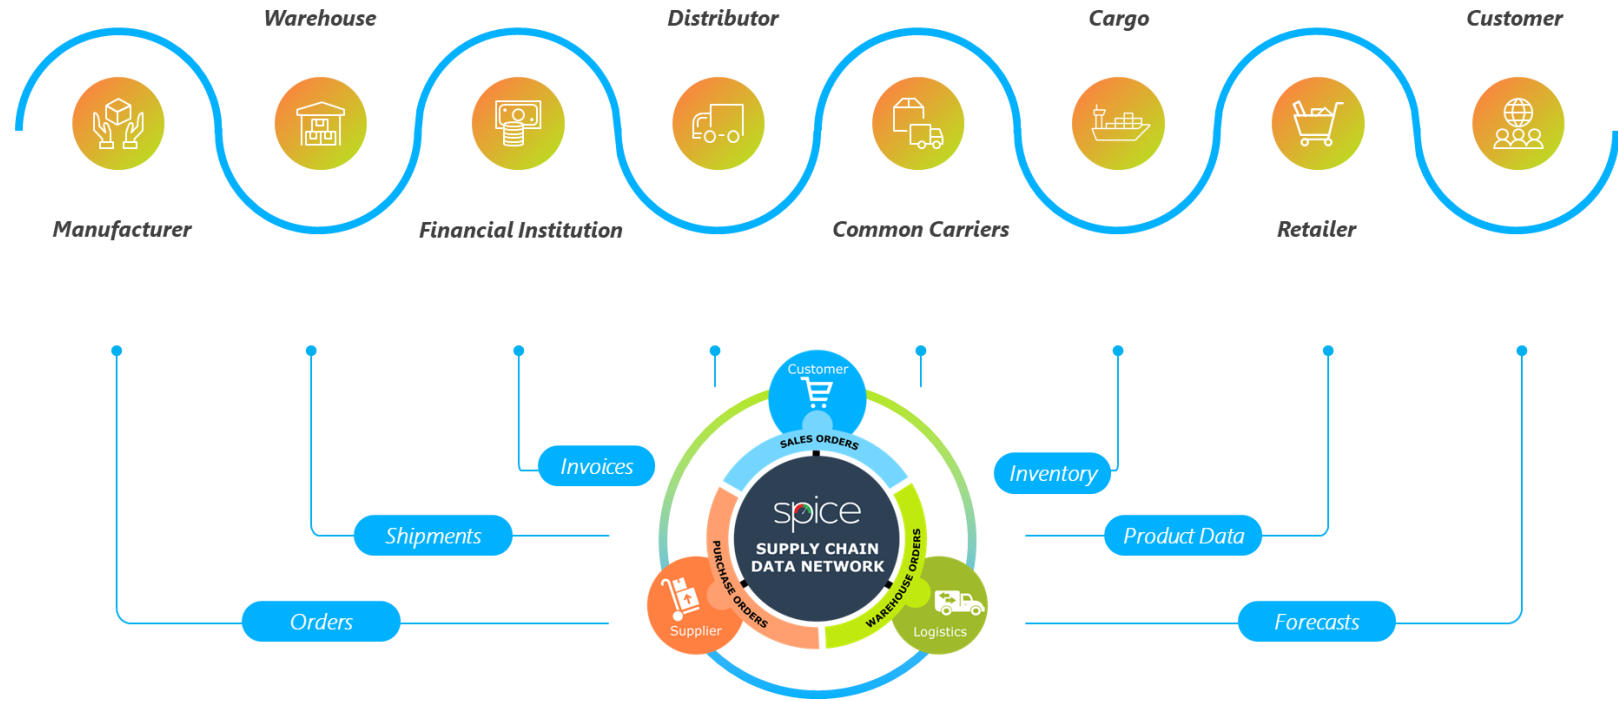

# Spice's Supply Chain Data Network enables "Network inventory visibility"

The modern retail and grocery consumer expects to have what they want, wherever and whenever they desire. As retailers embark on digital transformation initiatives, to transform from the traditional linear supply chain to the interconnected, always-on digital supply network, real time supplier and carrier integration and collaboration is a key enabler

Spice's SaaS solutions allow retail and grocery chains to rapidly integrate and enable data exchange with their entire supplier and carrier base, regardless of the trading partner's size, location or IT capability. With Spice, retailers can rapidly onboard vendor catalog data to list new items, send orders, receive order confirmations, shipment notice, invoices and much more.

Over 40% of data required by transactional systems such as ERP, TMS and WMS originates from (or is augmented by) external trading partners such as suppliers and carriers. When combined with analytics and automation, supply chain transactional data, derived from suppliers and carriers, drives end-to-end visibility at the SKU level. The infusion of data and advanced insights into the operational processes of global supply chains is a key enabler that drives significant value to retail and grocery eco-system.

# Software-as-a-Service Solutions for Multi-Enterprise Integration

An **outsourced EDI/API Management** solution that enables organizations to manage all their transactional data exchange with all B2B Trading Partners and gain end-to-end **visibility** of the **supply chain**
